

Srinivas kanuri

I'm eager to move into frontend development, and I have a good grasp of HTML, CSS, JavaScript, and Figma. My time at CMS (Cash Management Services), where things move quickly and details matter, has helped me become very accurate, good at following procedures, and able to solve problems. I've been working on my own projects and constantly learning to build my web development and UI design skills, and I'm excited to join a team where I can contribute.

PROJECTS

To-do list [🔗](#)

January 2025 - January 2025

Developed a to-do list application with HTML, CSS, and JavaScript as a learning project. This project provided experience in DOM manipulation, event handling, form input (including date pickers), and basic front-end development. It allows users to add, delete, and mark tasks as done, with the ability to set due dates for tasks.

Drive in cars rental [🔗](#)

January 2024 - February 2p24

Developed the user interface and user experience for a "Drive-In Cars Rental" web application in Figma. Focused on creating an intuitive and user-friendly platform for car rentals.
